🔗 Portfolio

Objective

Detail-oriented Full-Stack Developer with strong experience in React.js, Next.js, Node.js, and modern web technologies, passionate about building AI-powered applications and rapid prototypes. Skilled in integrating LLM APIs, developing responsive user interfaces, and creating scalable backend systems. Eager to contribute to innovative AI products by combining full-stack engineering with practical AI integration and problem-solving skills.

Professional Experience

3C Coding School

Academic Team Lead

Sep 2024 – present

- Directed a team of instructors by providing continuous mentorship, rigorous performance evaluations, and tailored professional development, resulting in consistently high-quality instruction.
- Designed and implemented comprehensive programming course curricula that adhered to industry standards and academic goals, significantly improving student engagement and learning outcomes.

Web Development Instructor

Feb 2024 – Present

- Taught Frontend and Backend to students of varying age groups and skill levels.
- Designed and delivered engaging, hands-on lessons that improved student accelerated learning outcomes. Most of the students were able to build and deploy their responsive web applications by the end of the course.

Coding Instructor

Jul 2023 – present

- Designed and delivered age-appropriate coding curricula for more than 300 students, significantly improving average assessment scores.
- Conducted interactive workshops that produced over 50 fully functional apps, games, and tools, strengthening students' practical coding abilities.

STEM Entrepreneurship Center

Mar 2025 – Jul 2025

Full Stack Development Intern

During this internship, I gained practical experience across the full stack, including developing interactive user interfaces, building server-side applications and APIs, and efficiently managing data using both SQL and NoSQL databases.

NTI - National Telecommunication Institute

Jul 2025 – Sep 2025

- Mastered Cloud foundations, core AWS services, security, economics, and solutions architecture
- Completed the AWS Academy Cloud Architecting track (Storage, Compute, Database, Networking, Microservices, Serverless)

Projects

Student Activity Management System

Graduation Project

An AI-powered full-stack platform developed to streamline student community management through two integrated systems: an intelligent Recruitment Management System and a modern Learning Management System (LMS).

- Engineered an AI-assisted recruitment platform that analyzes and evaluates CVs using LLM-based workflows to help recruiters assess applicant suitability and accelerate hiring decisions.
- Built interactive LMS features including student scoring systems, progress tracking, activity management, and real-time video conferencing for online learning sessions.
- Developed an AI Interview Agent capable of simulating technical interviews and dynamically evaluating students' knowledge, communication, and field-specific skills.
- Designed scalable full-stack architecture with responsive user interfaces and secure backend APIs to support high-performance educational and recruitment workflows.
- Focused on rapid prototyping and AI integration to deliver intelligent automation features that enhance both learning experiences and recruitment efficiency.

Tarkeba E-Commerce

A production-grade full-stack e-commerce platform for the perfume industry built with Next.js, NestJS, TypeScript, MongoDB, and Redis, featuring scalable architecture, secure authentication, and advanced commerce workflows.

- Developed modular backend systems with NestJS using domain-driven architecture and scalable RESTful APIs.
- Implemented advanced authentication and security features, including JWT token rotation, OAuth 2.0, RBAC, OTP verification, and session management.
- Integrated external services such as Paymob payment gateway, Cloudinary, Redis, and BullMQ for asynchronous background job processing.
- Built intelligent commerce features including smart checkout, atomic stock management, variant-based inventory, coupon systems, and admin analytics dashboards.
- Applied clean architecture, SOLID principles, and scalable backend engineering practices to deliver a secure and maintainable enterprise-level application.

Maswada-AI

An AI-powered full-stack bilingual note-taking platform built with React, Node.js, TypeScript, and Gemini AI, focused on intelligent content generation and productivity enhancement.

- Integrated LLM-powered workflows using Gemini AI for note summarization, rewriting, translation, and AI-assisted content generation in both Arabic and English.
- Developed responsive and modern user interfaces with React, Tailwind CSS, and full RTL/LTR multilingual support.
- Built scalable backend APIs with Express.js and TypeScript, including secure authentication, validation, and structured data management.
- Implemented AI-driven productivity features designed to enhance user experience through intelligent automation and rapid content processing.
- Focused on clean architecture, seamless AI integration, and production-ready full-stack development practices.

Skills

Frontend Development

- HTML
- CSS
- Bootstrap
- Tailwind
- JavaScript (ES6+)
- React
- Angular

Tools & Technologies

- Git & GitHub
- Linux (Ubuntu)
- Amazon Web Service (AWS)
- Redis
- Claude Code
- Prompt Engineering
- LLM Integration

Backend Development

- Node.js
- Express.js
- TypeScript
- Nest.js
- RESTful APIs

Software Development

Concepts:

- Software Design & Architecture
- Design Patterns
- Data Structures & Algorithms
- OOP

Databases

- MySQL
- PostgreSQL
- MongoDB

Soft Skills

- Attention to Detail
- Presentation Skills
- Communication Skills
- Problem-Solving
- Team Leadership
- Teamwork

Education

Helwan university

Sep 2022 – Jun 2026

Software Engineering

Cairo, Egypt

Bachelor of Computer Science in Software Engineering (Expected Graduation: June 2026)

Certificates

- Full Stack Software Development [🔗](#)
- Backend Engineering with Node.js [🔗](#)
- AWS Academy Graduate - AWS Academy Cloud Foundations [🔗](#)
- Backend Engineering with Nest.js [🔗](#)
- JavaScript Algorithms and Data Structures [🔗](#)
- Frontend Engineering with React.js 19 [🔗](#)
